Crying Audio Tape or CD  
Five 11"X17" Are You Tough Enough Posters

*National Center on*  
**Shaken Baby Syndrome**  
[www.dontshake.com](http://www.dontshake.com)

This program is designed for teachers to help educate students on the dangers of shaking an infant or young child. It is divided into different sections for teachers to present to their students. There are 45 and 90 minute presentations to choose from. Both include discussions on coping with crying, what common triggers are for frustration that lead to shaking an infant, as well as a student quiz on the discussion material.

## **Understanding Shaken Baby Syndrome**

Section one is designed to help teachers present the basics of shaken baby syndrome (SBS). In specific; what causes SBS, the long-term effects, what triggers shaking and the victims and perpetrators of SBS.

## **Classroom Demonstrations**

Section two is designed to help teachers visually describe SBS. Included in this program is a crying audio tape or CD of an actual infant crying inconsolably. This will help students experience and recognize the potential frustration when caring for a crying infant. A CD-ROM is included with additional materials on the history of SBS, and the injuries caused from SBS. All information on the CD-ROM can be printed onto transparencies.

## **Elijah's Story**

Along with this program is *Elijah's Story*, a documentary on the short life of a 16-month-old who was shaken by his biological father. There is also a touching letter from Elijah's mother, Emily. This film is 28-minutes long and can be upgraded from VHS to DVD.

## **High School & Junior High School Presentations**

This program is designed for a 90-minute high school course or a 45-minute junior high school course. Both sections provide in-depth material about SBS that correspond to transparencies, classroom demonstrations and *Elijah's Story*.

## **Additional Demonstration Materials**

A powerful way to convey what shaking does to an infant is to use our new SBS demonstration dolls. These dolls are 20" and are excellent for demonstrations. The dolls come in Caucasian, African-American and for a limited time, in Asian. Each doll costs \$30.00.

# Kids Are Worth It!

## Elijah's Story

Elijah's Story is a moving SBS documentary, that is an effective teaching tool. Filmed by an Academy Award-winning filmmaker, it follows the life of a 16-month-old who was shaken to death by his biological father when he got frustrated with Elijah's crying.

The film includes candid interviews with Elijah's mother, father and grandparents, as well as the 911 call, the father's taped confession and statements from prison. Two versions are available, the original 28-minute video and an 18-minute version with fewer emotional scenes, and an added interview by a physician talking about what can be learned from the film.

"Most new parents who had seen *Elijah's Story* say it had a significant positive impact on any inclination they may have had to shake their infants and newborns." – Parent Focus Group, Dan Jones & Associates Inc., Utah

## Mighty Like a Rose

The Kelly Deaun Rust Story

Kelly was 6 months old when her babysitter shook her. She suffered permanent brain damage, blindness, paralysis and was prone to many seizures throughout her 11 years of life. This film brings viewers into the home of Kelly, and recounts her short life and the devastation of shaken baby syndrome. The testimony of Kelly's mother, father and sister leaves a lasting impression on how shaken baby syndrome affects every aspect of surviving victims' lives and those of their family.
